Policy Document on Waste Management Date : .....

**Overview:** Waste management includes the processes and actions required to manage waste from its inception to its final disposal. It's of extreme importance as it reduces the effect of waste on the environment and helps reuse or recycle resources.

**Scope:** Awareness on Waste Management for staff and students of Scholar B.Ed. College.

**Vision:** The policy is designed to help us instill waste management awareness to our staff and students, to implement it to our own everyday activities helping us to realize our responsibilities and a sheer commitment to conservation of natural and man-made resources by implementation of waste management techniques.

**Execution:** We at Scholar are devoted to conduct waste management literacy programs through several awareness sessions, workshops and activities all directed towards the implementation of best mechanisms of waste management.

**Tangible Measures:** To abide by the policy ensuring best waste management techniques, our college has taken some tangible measures and key initiatives as following -

- To ensure the implementation of best mechanisms of waste management, we store bio-degradable and non-bio degradable waste separately.
- We have resorted to **vermi-composting** to convert organic waste into fertilizer further leading to reuse and recycling of waste, not only limiting to its purview to waste management but extending it further to its contribution to the environment.
- Awareness sessions to promote awareness on waste management.
- Periodical meetings between college staff and committee regarding formulation of rules and regulations leading to effective mechanisms for waste management.
- Regular cleaning and maintenance of waste management facilities.
- Different colored *Waste Bins* across the campus are placed at strategic locations.
- Safe disposal of hazardous waste which cannot be recycled or reused is adopted depending upon waste category.

**Communication and Update:** This policy is regularly communicated to our students, employees, internal and external stakeholders through various communication channels. The Waste Management Policy, objectives and targets are reviewed on a regular basis under the strict guidance of all the members of the college management.
